

### Assignment 3: Mapping Census data

#### 1) Map: choropleth of one variable (with a clear legend and title).

#### Median Home Value in Counties of Ohio

Higher values indicate more expensive housing markets.

Source: U.S. Census Bureau via tidycensus

Median home values are highest in urban and suburban counties such as Delaware, Franklin, Hamilton, and Cuyahoga, while rural southeastern counties show much lower values. This pattern reflects stronger housing demand around metropolitan areas.

#### 2) Table: top/bottom 10 areas by the other variable (include MOE).

**Table 1: Top 10 Ohio Counties by Percent Bachelor's Degree or Higher**
